DESCRIPTION

The project consists of the exploitation of Comisión Federal de Electricidad's (CFE) fiber optic infrastructure to launch a Telecommunications Network, thus materializing the Government's Program "Internet for All". Its primary objective is to provide free internet access to public institutions such as schools, hospitals, public parks, federal buildings, etc. According to its commercial strategy, the winning bidder will be entitled to use the excess capacity to provide telecommunications services to third parties, at its own account and expense.

CFE does not acquire any obligation as a result of the publication of the preliminary tender guidelines. These guidelines are published with the sole purpose of obtaining information and feedback that contribute to the planning process.
