Sustainability criteria

**Project's sustainability summary:** The project seeks to produce 187 GWh per year from Morelos, taking advantage of an area of 222 ha with a photovoltaic park in Morelos, with a total capacity of 70 MW to satisfy the energy demand of 54,961 homes and save the emission of 121,683 tons of CO2 per year.

Sustainability criteria

Economic and social returns

Creation of employment opportunities and boost local productivity

Financial sustainability of assets

Detailed risk analysis

Cash flow transparency and creditworthiness

Infrastructure asset maintenance and optimal use

Sustainability incentives

Greenhouse gas emissions

Climate risks, resilience and disaster risk management
Impacts on biodiversity and native flora and fauna in the region

Environmental impact of the Project

Control and monitoring of pollutants

Efficient use of resources and recycling strategies

Efficient use of energy and renewable sources

Preservation or enhancement of public spaces

**EXAMPLE OF GOOD PRACTICES** 

<b>i</b>	SOCIAL SUSTAINABILITY			
EXAMPLE OF GOOD PRACTICES				

Sustainability criteria			Г2 ¦ Т
Reduction of poverty and access to basic services		- 1	- 1
Integration of communities and other interested parties	;	- !	- !
Integration of people with disabilities or special needs	;	- !	- !
Effects of the project in the security of the region and in the health of workers and nearby communities	<b>\$</b>		
Compliance with human and labor rights		- !	- !
Cultural heritage and indigenous people			- !
Gender inclusion and women's economic empowerment through the project	t	- !	- !
Equal distribution of benefits and compensations to communities		- !	- !

Sustainability criteria

Alignment with national and international strategies
Sectoral and institutional integration
Corporate sustainability, management and governance
Transparency and anti-corruption protocols
Legal requirements and compliance with social and environmental policies
Development of more sustainable technologies and capacities
Knowledge transfer in matters related to sustainability
Pre-existing conditions and their monitoring

# Comparison of this project vs other projects of the same subsector

(Number of projects included: 23)

Methodological framework defined by the Inter-American Development Bank (IDB)

## PROJECT SUSTAINABILITY SHEET

PROJECT: 0556 CENACE: 2nd Long Term Power Auction (SLP-1/2016) Xoxocotla

SECTOR: Electricity

SUBSECTOR: Solar Power

**STAGE ANALYZED:** Operation

YEAR OF UPDATE: 2023

This section aims to present the potential alignment of the infrastructure project with the 17 Sustainable Development Goals (SDGs) of the 2030 Agenda. The relevance of this exercise resides in that it provides information to the actors of the infrastructure ecosystem for decision-making in investment that considers and promotes sustainable development.

#### 2. ALIGNMENT BY SDG

3. ALIGNMENT BY **CRITERIA AND TARGETS** 

View

Explanation of the alignment of the sustainability criteria and the SDGs. View

The tonality of the bars represents the level of detail of the information available from the IDB criteria and its potential alignment for each SDG, based on the scale: N.A., TIER 1, TIER 2 or TIER 3.

Number of times the project information coincides with the alignment of the IDB criteria and the SDGs.

Approximate reference to the number of maximum alignments a project can have between the IDB criteria and the targets of the SDGs.

#### PROJECT

DESIGN, CONSTRUCTION, EQUIPMENT, INSTALLATION, OPERATION AND MAINTENANCE OF A PHOTOVOLTAIC POWER PLANT IN THE STATE OF MORELOS.

SECTOR: ELECTRICITY SUBSECTOR: SOLAR POWER

Type of Investment:	Brownfield				
Power Auction:	SLP-1/2016: Second Long Term Power Auction				
Short Name of the Project:	0556 CENACE: 2nd Long Term Power Auction (SLP-1/2016) Xoxocotla				
Contract Currency: Mexican Pesos MXN	Estimated Investment MXN \$ 1,704,000,000	Estimated Investment USD \$82,718,446	Exchange rate (USD/MXN) used by the Ministry of Finance for the economic plan 2023 \$ 20.6		

#### **DESCRIPTION**

The project consists of the design, construction, equipment, installation, operation and maintenance of Xoxocotla photovoltaic power plant with a total production capacity of 70 MW in the state of Morelos. The plant has the following features:

Power Zone: National Export Area: "Oriental"

Export Subarea: "Oriental-Puebla"

Price Area: Puebla

Interconnection Zone: TLATIZAPAN TLZ-85 73090 PUENTE DE IXTLA PTI-TLZ-

Contract Scope: Design, Construction, Equipment, Installation, Operation, Maintenance

Type of Project: Public Selection Process: Public Auction Term: 15 years

Type of Contract: Assignment Payment Source: Project revenues / Rate

Asset (s): Solar Farm 70 MW
